User Manual
1. User will pick their mood from the following choices:
    a. Happy
    b. Sad
    c. Flirty
    d. Scared
    e. Angry
2. From the mood selection the application will generate a recommendation for a **Movie, Restaurant,** and **Recipe.**
3. If the user likes the recommendation they will then have the option to save it.
4. If they do not like the generated recommendation they will have the option to generate a new recommendation all together.
5. The user can also choose to view all of their saved recommendations.
6. The user can quit the application anytime by Clicking on the X at the top right corner of the application screen
